New Oil Separator for Single Circuit Chiller

Introducing a New Oil Separator for single circuit screw chillers for installations in India.

Oil Separator: Old vs New Comparison

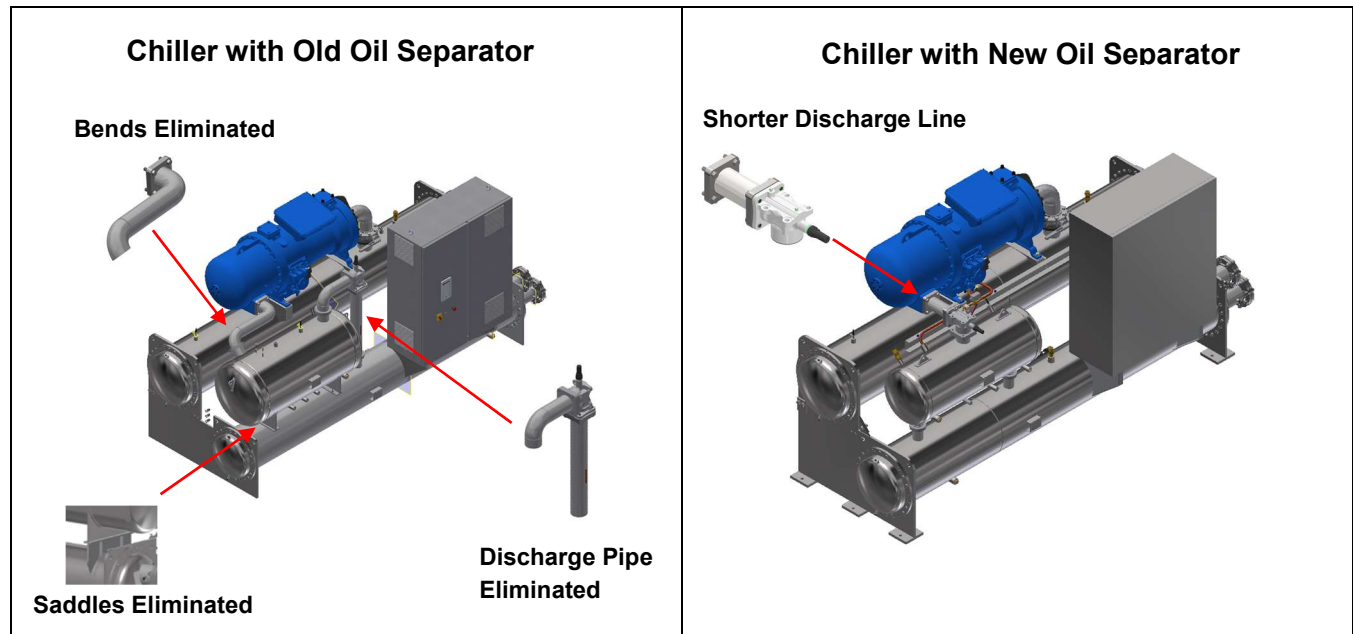

Old Oil Separator	Oil Charge	R134a	Weight	New Oil Separator	Oil Charge		R134a	Weight
	(Liter)	(Kg)	(Kg)		(Liter)		(Kg)	(Kg)
22" Dia. X 1456 mm L	30	12.2	240	16" Dia. X 1457 mm L	27	Regular Chiller	6.2	140
					30	Sp. Brine Chiller		
26" Dia. X 1615 mm L	35	15	500	20" Dia. X 1474 mm L	35		8.8	269

Benefits:

- Improved sustainability
- Enhanced chiller performance
 - Discharge pressure drop reduction
 - Improved oil separation efficiency
- Standardization
- Ease of manufacturing
- Lower refrigerant & oil quantity
- Weight reduction
- Chiller cost reduction

WC Chiller: Old vs New Comparison

Existing Products Improved:

- Water Cooled Screw Chillers: KWI, KWK
- Air Cooled Screw Chillers: KAF
- Screw Liquid Chillers: KWS Special Brine Series

New Products with New Oil Separator:

- Water to Water Flooded Heat Pump: KWHP

Future Plan:

- Export orders
