

ENGINEERING BULLETIN

Product Release

This Bulletin is to inform that new Refrigerant series R1234ze is added to AHRI certified product list

Performance available in KCPL WCSS software Version 1.4.1

No: EB/17-18/007,
2nd December 2017

Dear Colleague,

We hereby wish to inform you the official release of chiller series with new refrigerant R1234ze. This series has following features:

➤ Green Refrigerant

R1234ze has a GWP (Global Warming Potential) value which is less than 1 and zero ODP.

➤ Inverter Feature

R1234ze chillers are provided with VFD drives for capacity control ensuring high full load & part load efficiency.

➤ Low operating pressures

R1234ze is having lower operating pressures as compared with R134a refrigerant.

➤ Oil Pump

Due to lower operating pressures, chiller with R1234ze refrigerant requires additional oil pump to develop required oil pressure at lower ambient.

➤ Performance closer to R134a chillers

R1234ze refrigerant chillers has no difference in efficiency, both full load & part load, as compared to R134a.

➤ Slightly flammable but require high ignition temperature to generate flame

ASHRAE classifies R1234ze as mildly flammable refrigerant. However, at temperatures under 30°C it does not form flammable mixtures with air and therefore could be considered as non-flammable for handling and storage.

This series has following models:

KWI130.1G, KWI195.1G, KWI275.2G, KWI340.2G, KWI390.2G, KWI145.1G, KWI210.1G, KWI295.2G, KWI355.2G, KWI405.2G, KWI170.1G, KWI260.2G, KWI320.2G, KWI370.2G, KWI420.2G
