

ENGINEERING BULLETIN

Series Release

This Bulletin is to inform that, now KWI-R134a series will be offered with *Falling Film Evaporator* only.

Updated performance, physical data available with KCPL WCSS software Version 1.4.2

No: EB/17-18/011,
26th December 2017

Dear Colleague,

With this bulletin we are officially releasing KWI-R134a chiller series with Falling Film Evaporator. KCPL chiller selection software revised version 1.4.2 includes performance of this series along with Physical data.

Note following points with regards to this series;

- *There is change in physical data*
- *PED/CE certification for this series is under progress & we are targeting it to release by 31st Jan 18. If any such requirement comes before 31st Jan-18, please consider longer delivery period*
- *Already received orders (Version 1.4.1) shall be dispatched with regular flooded evaporators. If any advanced stages of finalization & can't be converted to FFE, please inform Engineering beforehand on case to case basis.*
