Introduction of Schneider make VFD for Water- Cooled Screw Chillers

Dear Colleague,

We wish to inform you that here onwards, all KWI screw chiller models shall be with “SCHNEIDER” make VFDs. List pricing released is with Schneider VFD as default option and there will be price adder if specifically, “Danfoss” make VFDs are required. Sales should properly communicate such requirements at the receipt of order.

All existing features & specifications like various safeties, Display parameters, IP ratings shall remain the same in both the cases.

We are planning to implement this change in steps to other series as well and will update through bulletins from time to time as per progress.
