EB/21-22/009

17th April, 2021

Dear Colleague,

We hereby wish to inform you of the official release of the new
Screw Selection Software – **Kirloskar Chillers Selection Tool
(KCST)** version 2.0.0.

Important:

The new software 'KCST' is certified by AHRI, dated 15th Apr 21. Hence it
is mandatory to refer same from date of approval.

Software is certified for KWK, KWI, KWS and KAS series.

Refer old software 'Kirloskar Chiller selection system' for KCM chiller
selections.

KWE series is discontinued, user can select Economic model from
KWK/KWI series and select feature/accessories from software itself
based on customer need & cost optimization.

Submit selection/revised performance from new software for orders
those are in initial stage. Contact Sales Head where submitting revised
performance in not possible.

Old models will appear in earlier selection software for few more
months, it will be for reference only.

Key Features:

- **Web Based Platform**

Advantages are access from anywhere, Faster updates ensuring latest version access, High security & flexibility, etc.

- **Option of Various Applications**

- Standard Chiller

- Brine Chiller

- Heat Pump

- High temperature chiller

Refer user manual for more details

- **User selectable Heat exchanger combination (In KWK & KWI Series)**

- **Option of Various tube materials like Cu, CuNi, SS, Ti.**

- **Option of Multiple pass for Heat Exchangers**

- **New Model Nomenclature**

Refer user manual for model nomenclature designation

- **Flexibility in selection of accessories, safeties & features based on customer need & cost optimization.**

- **Detailed Physical data including Refrigerant charge**

- **Auto Top Code Generation for Order execution**

- **Customer Record & Management.**

Notes:

1. Second Phase development of software is going on for new series/ feature additions, user Interface changes. However if you have any further feedback, query, suggestion, send mail on below mail id's.
