Product Update

Modification in centrifugal chiller oil pump.

Dear Colleague,

We hereby wish to inform there is an upgrade in centrifugal chiller oil pump; we are shifting from 1- phase oil pump to 3-phase oil pump since 1- phase motor getting obsolete. Moreover 3-phase pump is more reliable.

For KSC 63 / 79 / 87 this change will be effective immediately & in near future we will implement this for KSC 100 / 113 / 126. Once this is implemented for later we will inform accordingly.

For the Chillers with unit mounted starter panel there shall not be any change at customer end, however for free standing panel there will be change in interfacing wiring at customer end (1-phase to 3-phase)
