Notes:

- For **R-22 Screw chillers** with MOBIL ARCTIC 300 oil, new RL 68 oil can be charged. Only care should be taken to top up as much quantity as old ARCTIC 300 oil removed from the chiller.
- Always cross check oil separator type (vertical or horizontal) for getting accurate quantity.
- Please note that lead time for **MEL-56** will be more as we don't stock it.
- For chillers with 20" Oil separator oil quantity changed from 35 liters to 30 liters. **Do not refer charge mentioned on name plate.**
- For chillers with 22" single and double circuit Oil separator, **refer charge mentioned on name plate before charging.**
